

MLD Hackathon Information

The end of semester hackathon for the Machine Learning Decal will be this coming Sunday, December 2nd from 10am-6pm in Cory and Soda Hall.

During the hackathon, you can participate in one of the 3 competition tracks (computer vision, natural language processing, or reinforcement learning), or you can work on any other project you are interested in. Please see the specs for each of the 3 competition tracks on the class Github page.

To have the hackathon waive the final project for this class, you are required to attend for the entire duration and submit a project that shows good effort. For those who would rather do the final project, the project/competition requirements are the same as during the hackathon, with the addition of a few page writeup on what you did (exact details coming soon on Piazza).

Please fill out this form to sign up for the hackathon: <https://tinyurl.com/mld-hackathon-signup>

Here is the tentative schedule for the day:
